**MOCA Systems Opens San Antonio, TX Office**

**San Antonio, TX (January 10, 2008)** - MOCA Systems opened a regional office in San Antonio, TX to support the Military Construction (MILCON) and Base Realignment and Consolidation (BRAC) programs of the US Air Force and US Army throughout the western US region.

Over the past few years, MOCA has supported the Air Force Center for Engineering and Environment (AFCEE) headquartered in San Antonio with innovative project control services based on the MOCABuild construction simulation system on over 30 different USAF projects. These have included traditional MILCON projects to some of the most challenging programs such as the Guam construction build-out and the Hurricane Katrina Reconstruction efforts.

Recently, the US Army Corps of Engineers (USACE) and AFCEE have been finalizing the planning, and are now starting the construction of a significant portion of the \$2.3 Billion BRAC program across Fort Sam Houston and other regional military bases in San Antonio. MOCA Systems has been providing critical project control oversight based on MOCABuild and a detailed economic fact-base on the San Antonio region including local market material and labor pricing and availability based on expected construction volume over the next five years.

At the Joint CMAA/SAME Meeting in San Antonio on January 8<sup>th</sup>, 2008, MOCA Systems was invited as the keynote speaker. Kevin Bernier, President & CEO, discussed both the challenges and opportunities in planning and executing complex construction programs such as the San Antonio BRAC program. The presentation highlighted innovative and proven project control capabilities that are being used on the San Antonio BRAC program and other regional construction programs to greatly improve on-time and within-budget project performance.

**About MOCA Systems**

MOCA Systems is a nationally recognized program and construction management firm that provides a proven project control service based on an innovative technology platform called MOCABuild. MOCA has provided these services to over \$10 billion in related Department of Defense military construction (MILCON) and Base Realignment and Closure (BRAC) programs.
