

Position: **Energy Management Consultants**

MOCA Systems, Inc. is an innovative leader and provider of program, engineering, and construction management services for public agencies and private sector companies around the country. MOCA offers a range of program management, cost engineering, planning, design, energy and construction management services. Established in 1999, MOCA has helped deliver \$30 billion in facility and infrastructure programs around the world.

MOCA has an enterprise energy management practice that includes energy master planning, energy auditing, engineering, commissioning, energy conservation measure and renewable energy management. We have developed unique software technology to support our engineering consulting services for improved energy and sustainability (and net zero) planning and management.

We are growing a multi-disciplined team of experienced energy management personnel with technical expertise in energy management, energy audits and commissioning. We are interviewing for candidates interested in joining this team.

Qualifications you will have if you are a great candidate:

Required:

- Four-year college degree (B.S.) in Engineering, Energy or related field
- Accreditation as a Certified Energy Manager (CEM) through the Association of Energy Engineers
- 5+ years of experience in energy efficiency and demand management implementation programs.
- Strong technical knowledge and experience conducting energy engineering and management projects including facility energy audits, commissioning, and lifecycle cost analysis
- Technical understanding of renewable energy technology, facility HVAC equipment maintenance, utility regulations and environmental rules and regulations.
- Strong customer focus
- Willingness to travel at least 50% of the time, as needed

A Plus:

- Masters Degree in Engineering, Energy Management or related field
- PE certification

Are you able to perform the typical duties and responsibilities this job requires?

- Be a member of a team of people implementing technical energy engineering services and projects with a team of engineering personnel.
- Be a leader in the industry on energy and sustainability management using technology and tools to improve owner performance.
- Collaborate with clients, peers, project personnel, and all levels of management to develop solutions and ensure stakeholder buy-in
- Manage customer care issues such as billing inquiries, planning concerns, and performing other duties and responsibilities as assigned
