

MOCA Awarded Nationwide PMIS Contract with U.S. Army Corps of Engineers

Newton, MA (October 15, 2010) – MOCA Systems, Inc. (MOCA) is pleased to announce the award of a contract for the U.S. Army Corps of Engineers' (USACE) P2 Program Management Information System (PMIS).

"We are counting on the expertise of MOCA to improve P2 system adoption and data quality through the development of effective user centric dashboards, data quality management and continuous system improvements. We're so excited to have MOCA taking the lead with us," says Sam Zakhem, PE, PMP, PMBP Program Manager, U.S. Army Corps of Engineers Headquarters.

Project and Program Managers across the USACE are the P2 system's primary users. The P2 system is used for every USACE project and provides the link from USACE's Primavera budgeting/scheduling system and the USACE financial system (CEFMS). The USACE is planning a major upgrade to the P2 system in December 2010 called version 3.

Through multiple task orders, MOCA will help USACE HQ improve overall functionality of the P2 system and enhance its USACE-wide adoption by finding ways to improve ease-of-use and overall data quality. MOCA is providing a broad set of services to support USACE HQ and Districts in the design, implementation, and use of P2 v3. Some specific tasks include the preparation of training and other support material to aid the District staffs, definition of functional specifications for P2 v3 and future software versions, and the development of software enhancements such as web dashboards.
