MOCA Awarded Contract for CM Services with GE Transportation

NEWTON, Mass. – June 17, 2011 – MOCA Systems, Inc. (MOCA) has been selected to provide construction management (CM) services for General Electric (GE) Transportation’s Energy Storage division under a contract through the end of 2011.

The services provided will support GE during the construction of their \$100 million state-of-the-art GEMx Battery manufacturing plant in Schenectady, N.Y. MOCA services include on-site construction cost control and management, review and validation of contractor invoices and change orders, document audit, bid analysis, stakeholder coordination, and reporting.

The GEMx battery is a sodium-based battery that lasts up to ten times longer than traditional backup storage systems, needs little maintenance, produces no toxic chemicals, is recyclable, and a vital step in the evolution of high technology and green transportation solutions. Established more than 100 years ago, GE Transportation is a division of General Electric Company and is a leading supplier of technology and products to the railroad, marine, drilling, mining, and wind industries.
