MOCA Launches Innovative Energy Management Services

NEWTON, Mass. – February 16, 2011 – MOCA Systems, Inc. (MOCA) is pleased to announce the award of two contracts to provide innovative energy management services. These professional service contracts include the use of a new web-based application called MOCAEnergy™ that provides owners with an ability to develop their comprehensive energy and sustainability management programs. MOCAEnergy™ helps owners develop their long-range energy master plans such as achieving NetZero goals, and then tracks actual savings during the measurement and verification phases.

Partners HealthCare System is one of the largest healthcare organizations in the country, operating and managing 10 hospitals and clinics throughout the northeast United States, with a total of 13.8 million square feet of hospital space. MOCA will provide Partners HealthCare with a customized version of MOCAEnergy™ that meets Partners' operational objectives for tracking and managing their Strategic Energy Master Plan (SEMP), carbon emissions, and waste plan.

Salt Lake City is constructing a new 125,000 square foot Public Safety Building (PSB) at a cost of \$125 million which is expected to exceed LEED® Silver. MOCA has been hired to guide the city in the pursuit of NetZero Energy using MOCAEnergy™, which would make this the first NetZero Public Safety Building in the country.

"I am confident that our team is on track to make the PSB a new vibrant hub for the city and a leading example of good, sustainable design," said Salt Lake City Mayor Ralph Becker.
