MOCA Wins USACE Project Delivery Team of the Year Award

NEWTON, Mass. – July 19, 2011 – MOCA Systems, Inc. (MOCA) is pleased to announce the award of the U.S. Army Corps of Engineers (USACE) Project Delivery Team of the Year Award for Merit for our work on the Base Realignment and Closure (BRAC) program at Aberdeen Proving Grounds.

MOCA will be presented with the award at the USACE Summer Senior Leaders Conference on Aug. 1, 2011. The Project Delivery Team of the Year Award is awarded by HQ USACE annually to three Project Delivery Teams for accomplishments in support of USACE missions. Winning teams demonstrate synergy, integrated and coordinated management, teamwork, partnering, effective balancing of competing demands, applications of innovative technology and tools, and sharing of lessons learned.

The Aberdeen Proving Grounds BRAC program is a \$1.1 billion 5-phase program involving construction of the new Army Team Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) center.

The C4ISR Center of Excellence will be a state-of-the-art research and technology campus that includes nine buildings and more than 1.6 million square feet of new space, which will be LEED® Silver certified. This complex program also involves the transfer of Army and civilian personnel from Fort Monmouth, N.J. to Aberdeen Proving Ground, Md., as well as the hiring of 3,700 new federal government employees.

MOCA has been providing USACE with professional services that support the program lifecycle including sustainable design and construction management. In addition, MOCA is providing master integrated scheduling and logistic support to help support the complex movement of personnel.
