MOCA Named to ENR Top 100 Construction Management Firms in 2011

NEWTON, Mass. – Aug. 30, 2011 – MOCA Systems, Inc. (MOCA) was named one of the Top 100 Construction-Management-for-Fee Firms by Engineering News Record (ENR). MOCA ranked #67 in a field of the top engineering, architecture, and construction companies in the United States.

In 2010, MOCA provided a range of project management and construction management services to the federal government, state governments, and private companies. These services helped organizations to complete multiple complex projects, often performed simultaneously, more efficiently while controlling costs.

For more than 20 years, ENR has surveyed the construction industry to rank the 100 largest U.S. firms that provide fee-based construction management, program management, and project-related construction consulting services. The rankings are based upon agency CM fees for project-related construction management projects.
