### MOCA Systems promotes Michael Carr to COO and Hires William Yost as VP of Finance

*Newton, MA* – MOCA Systems, Inc. (MOCA) is pleased to announce that the firm has promoted Michael Carr to Chief Operating Officer (COO) from his prior position as Senior Vice President of Client Services.

In 1999, Michael helped found the firm and is one of the original researchers who developed MOCA's core technology at Massachusetts Institute of Technology (MIT). Over the course of his 10 years with MOCA, Michael Carr has performed nearly every service MOCA offers and has been instrumental in the firms' growth and successes. He has deep expertise across all aspects of MOCA's business and operations, and is uniquely qualified to assume this new position.

Prior to MOCA, Michael worked with Sellen Construction in Seattle, WA. He graduated from the Massachusetts Institute of Technology with a master's degree in civil engineering and from the University of Alberta in civil and environmental engineering.

It is also with great pleasure that the firm has announced the hiring of William Yost as Vice President of Finance and Administration. William has 35 years of experience employed with the Maguire Group Inc. where he most served as Chief Financial Officer since 2004. Maguire Group has long been a leading architectural, engineering, planning and construction management firm with over 300 employees located across 12 offices who serve government and commercial clients across the nation. William graduated from Georgetown University with a degree in accounting.

"Michael's promotion and William's hiring will further the development of our corporate leadership to provide the required support to our clients and regional offices," says Kevin Bernier, MOCA's President & CEO.

### About MOCA Systems

MOCA Systems, Inc. is an innovative professional service firm delivering capital program and asset management solutions to clients across the globe. MOCA offers a range of services throughout the program lifecycle including a proven project control capability based on advanced construction simulation technology.
